LUNA
GEOMETRIC CERAMIC WALL TILE

Transparent, Silk, & Craquelé

LUNA

LUNA is characterized by the unique hexagonal shape and by several special pieces recalling the Moon phases. This collection is very versatile and suits different styles and combinations: the mix of the available sizes and the colors not only complete the wall tiling, but also create original and unexpected compositions. You won't resist playing with shapes and create synergies between the colors and the different surfaces: craquelé, transparent or silk.
